ROHIT D

FULL STACK DEVELOPER | B.TECH AI & DATA SCIENCE

8524066336 | rohitmanimegalai@gmail.com | Tamil Nadu, India

GitHub: github.com/ROHIT05-CODER | LinkedIn: linkedin.com/in/rohit-d-7244522b6

PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence & Data Science student targeting entry-level Full Stack Developer roles, with hands-on experience building web applications using React, JavaScript, Python, Flask, REST APIs, and SQL. Built practical applications including a Grocery AI Assistant and a Deepfake Identifier, with experience in API integration and basic deployment using Vercel and Render. Strong problem-solving mindset with an interest in full-stack and AI-powered applications.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

Backend & APIs: Python, Flask, REST APIs

Database: SQL

Tools & Deployment: Git, GitHub, Vercel, Render, Linux (Basic), Wokwi

Additional: OpenCV

PROJECTS

Grocery AI Assistant | React, Tailwind CSS, Python, Flask, REST API, Axios

- Developed a full-stack grocery assistant web application handling approximately 180–200 grocery items.
- Built REST APIs for product search and order processing using Flask.
- Designed a user flow covering product search, adding items, and final order review.
- Integrated the React frontend with the Flask backend using Axios for API communication.

Deepfake Identifier | Python, Flask, OpenCV, REST API, Vercel, Render

Second-Year Academic Project

- Developed a web application to analyze potentially AI-generated or manipulated images and videos.
- Implemented media processing using Python, Flask, and OpenCV.
- Tested the application with approximately 75–80 image/video samples in JPG and MP4 formats.
- Deployed and tested the application using Vercel and Render.

Green Motion – Sustainable Mobility | Arduino, Sensors, Embedded Systems

- Built a prototype electric vehicle using Arduino and sensors for obstacle detection.
- Focused on battery efficiency and sustainable mobility concepts.

INTERNSHIP EXPERIENCE

Data Science Intern — Infinity Cosmos

Internship period: Date not provided

- Gained foundational exposure to Python applications in Data Science.
- Learned introductory data analysis concepts and workflows.
- Explored practical applications of Python-based technologies.

EDUCATION

Bachelor of Technology – Artificial Intelligence & Data Science | Adhi College of Engineering and Technology

CGPA: 7.74 | Expected Graduation: 2026

ACHIEVEMENTS

1st Prize – Intellista'25 Department-Level Project Expo | 1st Prize – Circuit Debugging Contest, College Level

CERTIFICATIONS & LEARNING

Java & SQL | Prompt Engineering | Embedded Systems & Software Development self-learning

SOFT SKILLS

Problem Solving | Logical Thinking | Teamwork | Communication | Fast Learner
